Work Experience

Product Designer (Volunteer) NestAid

REMOTE, USA | DEC 2025 - PRESENT

- Designed the end-to-end scheduling experience for a B2B platform serving agency admins, care workers, and coordinators, translating complex role-based workflows into user flows, wireframes, and high-fidelity Figma prototypes.
- Simplified the shift-filling workflow to approximately 5 minutes, reducing manual coordination by 91%
- Used Claude and Cursor to translate validated designs into a functional web product within one week, extending ownership beyond Figma into front-end implementation.

UX Design Intern Inverse Paradox

PHILADELPHIA, USA | AUG 2025 - DEC 2025

- Designed 70+ responsive screens across 3 client verticals in Figma, documenting interaction states and edge cases to align 3 developers and 2 PMs before handoff across 12 agile sprints.
- Applied Hotjar behavioral analytics to identify navigation friction and restructure visual hierarchy, improving time-to-primary-CTA by 18%.
- Conducted heuristic evaluations and usability audits across 3 platforms, translating findings into prioritized design recommendations presented to client stakeholders.

UX Designer Vivek Kadecha Designs

INDIA | OCT 2021 - NOV 2023

- Led end-to-end design execution for 15+ residential, commercial, and hospitality projects, translating stakeholder requirements into concepts, technical deliverables, and final execution.
- Streamlined coordination and procurement workflows, reducing project delays by up to 30%; sustained 90%+ client satisfaction through structured presentations and decision documentation.

Selected Projects

Usher Mobile App Thesis Capstone Project

- Led end-to-end product design for an academic resource discovery experience, conducting 12 student interviews across 6 departments and translating findings through affinity mapping into information architecture, user flows, and high-fidelity Figma prototypes.
- Conducted moderated usability testing with 5 participants, achieving 92% task success and 75% user preference over Google; identified navigation clarity and recommendation transparency as key usability issues and iterated both before final delivery.

About Me

Product Designer with hands-on experience across 0-to-1 SaaS, agency work, and research-led digital products. Shipped a multi-role platform from concept to functional product in one week and validated a thesis product at 92% task success. Combines user research, interaction, and visual design, design systems, and AI-assisted prototyping to move complex workflows from discovery through implementation.

Skills

User Research (Qualitative & Quantitative), Usability Testing, Information Architecture, User Flows, Wire framing, Prototyping, Design Systems, Interaction Design, Accessibility (WCAG 2.1), Heuristic Evaluation, User Interviews, Stakeholder Interviews, A/B testing, User-centered design, Data analysis, Agile product environments

Tools

Figma	Cursor
Miro	HTML5
Adobe CC	CSS3
Sketch	JavaScript
Axure	React (Basic)
Framer	WordPress CMS
Zeplin	Lovable
Hotjar	UserTesting.com
Web flow	Square space

Education

Thomas Jefferson University

JAN 2024- DEC 2025 | PA, USA

Masters in User Experience Design (3.95 GPA)

Gujarat Technical University

AUG 2014- MAY 2019 | GUJ, INDIA

Bachelors of Architecture (3.6 GPA)

Certificates

- Google UX Design Professional Certificate (Coursera)
- GenAI for UX Designers (Coursera)
